

EMOTIONAL INTELLIGENCE FOR MANAGERS (EQMGC) © Voice Business

Great for anyone...who wants to successfully manage other people.

Purpose:

In business today people want more than just efficiency, they want "emotional value"- the positive feelings that good product, good service and good management bring. This in turn reflects directly on your business's bottom line. Good management of your people, your time and your resources brings good monetary rewards. Excellent emotional awareness and management of yourself and others is the prerequisite for this type of "emotional value".

In this course you will learn what it takes to communicate "good feelings" and develop meaningful lines of contact - even with a difficult staff member or boss. You will discover how the way you behave now may be helping or hindering the process of communication. We will take a good look at body language and how it is used to build rapport and good relationships, as well as listen to your voice and improve how you use it to communicate your ideas. Understanding and awareness of how to manage the emotional context in which you work in one-on-one conversations, small group meetings, team based interactions and through your telephone and email messages, will be covered in depth.

After this training session you should expect to feel a lot more confident and positive about your ability to deliver fantastic "emotional value". Just see how your company will value YOU now!
